Profile

🌟 Aspiring Cybersecurity Specialist

Creative Coder with a Vision. I'm Shimon Talukder Raj, a passionate HSC Science student (Batch 2026) focused on Red Teaming & DFIR, and Threat Detection. Currently, a science student (HSC-26), I've already completed multiple courses, including:

✪ Cyber Security & Ethical Hacking Career Track Program (Ostad)
✪ Cybersecurity Career Path by Microsoft & LinkedIn
✪ CCNA 200-301 (Simplilearn)
✪ Programming for Cybersecurity (Let's defend)
✪ Essential IT Skills – Basic computer, social-networking, and office knowledge

I've worked with over 20+ cybersecurity tools, including Nessus, Nmap, SQLMap, Metasploit, Burp Suite, Wireshark, Volatility, OWASP ZAP, and more, across different areas of networking, web exploitation, digital forensics, vulnerability scanning, and incident response. I'm actively progressing through the:

✪ Red team & blue team - THM
✪ Using GitHub Education
—Getting ready for the GitHub Foundation exam.
—using popular platforms for learning more Like: datacamp, educative, codedex, etc.

☞ Skills:
★ Programming: A Student of Bash Scripting, PowerShell, GO, Python, JavaScript, Data Structures and Algorithms, C, and Assembly Language.
★ Tools: 20+ cybersecurity tools in Red/Blue teaming & DFIR.
★ Others: Public Speaking & Playing instruments.

☞ Interests: Digital Forensics, Offensive Security, Malware Analysis.☞ Personal: A music lover, bookworm, and lifelong learner.
☞ My Goal: To become a versatile cybersecurity professional with hands-on experience in both offensive and defensive domains, while contributing to the security community through learning, sharing, and ethical practice.

Education

06/2024 – 06/2026

HSC | Science
Shahakurrom Degree College, Sylhet

- Explored key science topics like biology, chemistry, math, and physics through hands-on experiments and projects, which helped build a solid understanding of how things work in the natural world.

01/2012 – 03/2024

SSC | Science
broder guard public school and colloage

- Explored core science subjects like physics, chemistry, math, and biology, building a solid foundation through hands-on experiments and detailed study sessions.
- I have spent 10 years here.

Skills

Docker # Command Prompt # Vulnerability Assessment # Penetration Testing # Malware Analysis
Programming # Artificial Intelligence (AI) # Creative Problem-Solving # Analytical Thinking
Team Collaboration # Effective Communication # Microsoft Office # Public Speaking # Playing Music

Languages

100 % Bangla

85 % English

45 % Hindi

Awards

03/2026

National Exam- Medhabi Mukh
RTDS
Grateful to be recognized in the RTDS National Exam as part of the “Medhabi Mukh”. This achievement motivates me to keep improving, learning, and pushing myself toward bigger goals. Thankful for the support and inspiration that helped me reach this milestone.

Projects

08/2025

Ethical Hacking Projects
https://github.com/rajtalukder159/CyberSecurity-Project
This repository showcases a series of practical cybersecurity projects I have completed as part of my learning journey. Each project demonstrates hands-on skills in ethical hacking, penetration testing, vulnerability assessment, web/mobile security, malware analysis, and digital forensics. All activities were performed in legal, controlled environments for educational purposes.

02/2026

Project: Docker Debian Web Server
https://github.com/rajtalukder159/docker-debian-lab
Lab Project: Docker Debian Web Server Excited to share my two-part cybersecurity lab where I explored containerized environments, web server deployment, and basic Red Team techniques.
Part 1: Built a Debian container, installed Apache, mapped ports, and accessed the web server via localhost.
Part 2: Conducted enumeration and security testing using tools like Nmap, Gobuster, and Nikto, identifying misconfigurations and learning best practices for secure deployments.
